Profile

Full-Stack software developer with a MSc in Computer Science and BSc in Bilingual Biomedical Engineering. Other interests are physical exercise, finances, productivity and cryptocurrencies. I have developed a few apps just for fun and also create content: Blog, AWS OpenSearch, Intro to TDD. I bring good energy and a hard working mindset, I am easy to work with and try to provide value above what is expected.

Relevant Experience

April 2022-Present
Software Craftsperson, Codurance, London, UK
- Working in a technology agnostic software consultancy whose central core is composed of best practices and basics like SOLID principles, Agile and methodologies like XP using practices like pair programming. Codurances core values are Pragmatism, Excellence, Professionalism, Efficiency and Respect
- **VeryChic's Search Engine**: Search Engine. TS, AWS OpenSearch, Cucumber.
- **Client 2**: Retail company. Internal Tool to improve the product creation chain, from buying the materials to designing the item. Java, React, Cypress, Karate. BFFs and Microservices.

Aug 2019-Jan 2022
Java Developer, Ziath, Cambridge, UK
-Commercial experience with Java (Spring Boot and Hibernate), frameworks like Electron, and Typescript (Angular 8) as well as tools like Maven and Git. I also had the chance to work with web technologies (HTML, Javascript, CSS and frameworks Bootstrap) and frameworks like Thymeleaf.
-Mobile Application development using Angular Ionic for front-end development that communicates to the main API developed in Java.
-Also participated in the processes related to testing, bug tracking, maintenance, and deployment using tools like Jenkins or TeamCity.
-I had the opportunity to learn about the Linux environment and administration as well as Bash scripting due to my participation in a project that involves hardware and the fact that the main server's OS for that product runs on Linux.
-Customer support
-The dev team uses lean methods to communicate due to its size. The team is composed of 4 people (3 seniors and myself) which allowed me to learn as well as get independence, a critical mindset and let me participate in almost all the software products of the company.
-In the personal field, I must thank all the Ziath staff as I had the opportunity to work with all the departments daily: Operations, Sales, R&D and Production. I learn how to communicate with either technical and non-technical people, how to be more assertive and how to manage and leverage time. I was exposed to a wide range of experiences and stimuli that allowed me to understand problems and issues outside of my position as Software Developer and to not hesitate to use resources when needed.

Mar-Jun 2018
Intern, Calidad Pascual, Madrid, Spain
Mar-Jul 2018
Fab-Lab, University San Pablo CEU, Madrid, Spain
Sep 2016-May 2017
Student Researcher, CNIC, Madrid, Spain

Education
Dec 2020-Oct 2021
1:2 Master Stock Market and Financial Derivatives, UNED
Just for fun
Sep 2018-Sep 2019
